PREFACE.

THE Toronto Public Library, which contains 53,560 volumes, was first opened for public use in 1884, and is divided into the Reference Library and the Central and Branch Circulating Libraries.

For the first two years the efforts of the Management were devoted to the increase and organization of the Circulating Libraries, and it has only been during the past three years that they have attempted to lay the foundations of a Reference Library.

The present Catalogue contains all accessions to the Library until February 1st, 1889, and covers the same ground as the Card Catalogue, which has been in use from the first, but differs from it, in being strictly a subject catalogue with complete indices. Where necessary, entries have been repeated under different subject-headings when the book refers to two or more subjects.

Owing to the present composite character of the Library, the reader will also find it necessary to consult the catalogues and supplements of the Circulating Library for many of the most recent books.

Periodical literature has grown to such dimensions and contains so much that is valuable, that the reader will always find it profitable to consult "Poole's Index to Periodical Literature" and "Supplement," (1882-87), and the quarterly numbers of the Index to Periodicals.

The need of a handy Canadian bibliography has induced the Board to furnish a classified list of those Canadian books and books on Canada which they possess, which will be found at the end of this volume.

In applying for books at the counter, it is only necessary to insert in the blank form the name and short title, with the number of the book required, thus :—

Guest. English Rhythms. 1722. 11.

Books in the Hallam collection are marked by the letters H.C. preceding the number.

[ ] implies that the book was published anonymously.
